

Coarse Sea Salt produced from the same pure Sea Water  
that our Greenshell™ Mussels live in!

Please follow our unrefined sea salt instructions below  
to match the salinity of the water optimal for your mussel machine.

We recommend a ratio of 2.5 to 3% salinity to match the seawater where the mussels grow:

25-30 GRAMS OF SALT PER LITRE OF WATER

Or

1.5 KG OF SALT PER 50 LITRE OF WATER

REMEMBER TO CLEAN THE MUSSEL MACHINE 3 TIMES PER WEEK

Any questions please call the office at
